

# East Hill Flying Club Practice Areas

This map is distributed to local ATC with a letter of agreement designating our practice areas. Please continue to monitor Ithaca Tower on 119.60 even when “clear of Delta” and approved for frequency change. Requesting “flight following” from Elmira for “local flight” with a discrete squawk is a good idea (and good practice) when operating above 4,000 MSL.

Be continuously alert for other aircraft and clear thoroughly and often!
